

# HTF7000

HTF7000 is a new turbofan engine from Honeywell that matches the power of engines at comparable thrust levels with half the number of parts and a 30 percent lower cost of ownership. This new business aviation engine provides outstanding performance and industry-leading fuel efficiencies at a lower cost of ownership.

### Our Customers' Challenge:

To take advantage of the benefits of this new turbofan technology, the support of an authorized Honeywell service center is needed that is not only capable of providing warranty service and maintaining this engine but of providing comprehensive MRO services conveniently and efficiently.

### The StandardAero Solution:

StandardAero provides four convenient service centers as well as 24/7 Mobile Service Teams, that are trained, equipped and authorized to provide warranty and maintenance for HTF7000 as well as comprehensive MRO services for the Challenger 300, the Gulfstream G250 and the Embraer Legacy 450 and Legacy 500. All services can be performed onsite, so if you can't come to us, we will come to you.

### Why StandardAero?

StandardAero is the combination of four great aviation legacies, including Garrett Aviation Services, with 300 years of collective MRO experience and reputation.

- **Quality personnel – 249 Factory-Trained Technicians**
- **Reliability – Our technicians average 14.8 years in house.**
