

Rolls-Royce

# AE3007

## More Support. More Service. More Capability.

StandardAero has the only Rolls-Royce authorized maintenance center for the AE3007 engine in the United States, located in Maryville, TN. Our facility includes space, tooling and processes designed specifically for the needs of this engine. Our dedicated technicians have been maintaining the AE3007 since its launch and have repaired more of these engines than anyone else in the industry.

### Fast Turn Times

We realize engine downtime costs you money. By organizing our facility into groups of specialized repair cells, we have optimized the process flows throughout the facility and considerably reduced the amount of time your engine spends on our shop floor.

### We're There 24/7

We have teams of experts available 24/7 to provide emergency and troubleshooting support, and one of our Field Service Representatives can be on-site anywhere in the world within 48 hours.

### Capabilities:

- Sole US-based Rolls-Royce Authorized Maintenance Facility
- Guaranteed Turn Times
- Worldwide Field Service Support
- 24-Hour Customer Response
- Dedicated On-site Engineering and Technical Support
- Component Repair Capabilities
- Comprehensive Warranty Program

### Repair Certifications & Authorization:

- FAA Repair Station Certification: AEOR215N
- EASA.PART.145 Acceptance Certificate # EASA.145.4894
- CAAC 145 Repair Station (China) Certification: F00100140
- DAC 145 Repair Station (Brazil) Certification: CHE 9912-04/DAC
- ISO 9001:2000 Certified
- ISO 14001:2004 Certified
